

Q1 CANDIDATE INFORMATION

Candidate Name:

Christina Bisanz

Ward:

7

Municipality:

Newmarket

Q2 UPDATE ZONING BY-LAWS Outdated zoning by-laws are a barrier to building the right types of homes to keep up with demand. According to the Building Industry and Land Development Association, in order to keep up with demand, 50,000 new homes need to be built each year (only 38,000 were built in 2017). It is forecasted that 115,000 new residents per year will call the GTA their home. Decades old zoning restrictions primarily allow for detached homes, with a few exceptions of high-rise towers along major transit corridors, but there are not many options offered in-between, the so-called “missing middle.” The lack of choice in housing types is a serious issue. Municipal policies need to be more flexible so that home buyers can choose from the full spectrum of options, especially the “missing middle” – home types that bridge the gap between detached houses and condominium apartments. If elected, will you push for updating municipal zoning by-laws and policies that will allow and encourage more medium density housing in the GTA?

NO,

Comments (please specify):

We currently have a dearth of high rise condominium buildings, although more interest in this product is growing amongst the development industry. We have a number of town homes, including more stacked towns coming on the market. Unfortunately, even those are cost-prohibitive for many seniors wishing to downsize and age in place, and young people wishing to live in the community in which they work. More condominium/rental accommodation is needed. I can't speak for the rest of the GTA.

GTA Housing Issues Candidate Survey

Q3 OPPOSE ANY POTENTIAL NEW MLTTHousing supply and choice are already a challenge in the region. Let's not do anything that will make this worse, like introducing a municipal land transfer tax. A second land transfer tax will make it more expensive to move, which means people will stay put and there will be even less homes for sale for home buyers to choose from. Toronto has this double taxation with the provincial LTT and it has directly contributed to reducing choice for home buyers in Toronto because some current homeowners choose not to put their home up for sale when they realize how much they will have to pay in land transfer taxes to move. This tax distorts the market, hurts consumers, and will eventually discourage people from moving to the region, which will have a negative effect on talent attraction.If elected, will you strongly OPPOSE any new municipal land transfer tax in the GTA?

YES,

Comments (please specify):

I do not support adding additional taxes onto already high costs for housing.

Q4 REMOVE HOUSING SUPPLY RED TAPERed tape and delays caused by municipal approval processes slow down the creation of new housing (projects are delayed by up to 3–4 years according to the Building Industry and Land Development Association) and add costs that reduce affordability (around \$168,000 to a single-family house in GTA according to the C.D. Howe Institute). We need to find ways to streamline this process and make it more efficient so that we can get more housing supply into the market quicker, which, in turn, will provide more choice and affordability for home buyers and renters.If elected, would you support cutting approval times and other red tape barriers that limit the building of new housing in the GTA?

UNSURE,

Comments (please specify):

I am not in support of reducing timeframes that enable public engagement and consultation in the site planning process, or as might be required for environmental protection, ensuring appropriate thought is given to community impact (traffic, walkability, pressure on existing amenities, etc)

Q5 BUILD INFRASTRUCTURE Even when new housing developments are approved, they are often delayed by the need for municipal infrastructure to service the new area or building. Without roads or sewers, construction cannot even begin, hence adding another barrier to bringing more housing supply to the market. Municipalities often lack the funding or staff to expand services. Infrastructure investment funding comes from the provincial and federal governments. A recent report from the Canadian Centre for Economic Analysis found that the federal government has fallen behind on its commitment to invest in Ontario's infrastructure, like transit and transportation. Inadequate transit and transportation, coupled with a sluggish economy, will have a negative effect on real estate in the GTA region. Infrastructure investment in Ontario peaked eight years ago when 4.2% of GDP was spent; however, it has since diminished, with a decade-low occurring in 2016 when only 2.4% of GDP was invested. If elected, would you push for more investment in critical infrastructure, such as transportation, to facilitate growth and housing by finding creative ways to secure funding from the provincial and federal governments?

YES,

Comments (please specify):

Municipal governments are limited in ways to increase the revenue necessary to support infrastructure improvements. Absent increasing property taxes, there is a reliance on more support flowing from the other levels of government.
