

Q1 CANDIDATE INFORMATION

Candidate Name:	Ethan Eastwood
Ward:	Three
Municipality:	Oshawa

Q2 UPDATE ZONING BY-LAWS Outdated zoning by-laws are a barrier to building the right types of homes to keep up with demand. According to the Building Industry and Land Development Association, in order to keep up with demand, 50,000 new homes need to be built each year (only 38,000 were built in 2017). It is forecasted that 115,000 new residents per year will call the GTA their home. Decades old zoning restrictions primarily allow for detached homes, with a few exceptions of high-rise towers along major transit corridors, but there are not many options offered in-between, the so-called “missing middle.” The lack of choice in housing types is a serious issue. Municipal policies need to be more flexible so that home buyers can choose from the full spectrum of options, especially the “missing middle” – home types that bridge the gap between detached houses and condominium apartments. If elected, will you push for updating municipal zoning by-laws and policies that will allow and encourage more medium density housing in the GTA?

YES,

Comments (please specify):

Zoning is the overwhelming, most obvious issue facing Oshawa's new growth. Oshawa has been zoned for a city of the 1930s not for 2018. I believe this has to change. Zoning by-laws must be updated to accommodate the new growth of this cosmopolitan centre, and, if I'm elected, I will do everything within my power to champion this issue.

GTA Housing Issues Candidate Survey

Q3 OPPOSE ANY POTENTIAL NEW MLTTHousing supply and choice are already a challenge in the region. Let's not do anything that will make this worse, like introducing a municipal land transfer tax. A second land transfer tax will make it more expensive to move, which means people will stay put and there will be even less homes for sale for home buyers to choose from. Toronto has this double taxation with the provincial LTT and it has directly contributed to reducing choice for home buyers in Toronto because some current homeowners choose not to put their home up for sale when they realize how much they will have to pay in land transfer taxes to move. This tax distorts the market, hurts consumers, and will eventually discourage people from moving to the region, which will have a negative effect on talent attraction.If elected, will you strongly OPPOSE any new municipal land transfer tax in the GTA?

YES,

Comments (please specify):

I will strongly oppose the introduction of any land transfer tax to the GTA, if elected. My goal is to make it easier for people to find a home in Oshawa and the Durham Region and I believe that applying a land transfer tax to this region would be completely antithetical to that ideal, at this time.

Q4 REMOVE HOUSING SUPPLY RED TAPERed tape and delays caused by municipal approval processes slow down the creation of new housing (projects are delayed by up to 3–4 years according to the Building Industry and Land Development Association) and add costs that reduce affordability (around \$168,000 to a single-family house in GTA according to the C.D. Howe Institute). We need to find ways to streamline this process and make it more efficient so that we can get more housing supply into the market quicker, which, in turn, will provide more choice and affordability for home buyers and renters.If elected, would you support cutting approval times and other red tape barriers that limit the building of new housing in the GTA?

YES,

Comments (please specify):

As new zoning takes place in the planning of Oshawa's future it is imperative that local government officials help streamline the process new development in order to meet the needs of those who wish to call Oshawa and the Durham Region their home. Cutting governmental red tape is the start of realizing that goal, but it is also important to exercise some degree of caution as we go about doing this as rampant and misplaced construction is not the answer.

Q5 BUILD INFRASTRUCTURE Even when new housing developments are approved, they are often delayed by the need for municipal infrastructure to service the new area or building. Without roads or sewers, construction cannot even begin, hence adding another barrier to bringing more housing supply to the market. Municipalities often lack the funding or staff to expand services. Infrastructure investment funding comes from the provincial and federal governments. A recent report from the Canadian Centre for Economic Analysis found that the federal government has fallen behind on its commitment to invest in Ontario's infrastructure, like transit and transportation. Inadequate transit and transportation, coupled with a sluggish economy, will have a negative effect on real estate in the GTA region. Infrastructure investment in Ontario peaked eight years ago when 4.2% of GDP was spent; however, it has since diminished, with a decade-low occurring in 2016 when only 2.4% of GDP was invested. If elected, would you push for more investment in critical infrastructure, such as transportation, to facilitate growth and housing by finding creative ways to secure funding from the provincial and federal governments?

YES,

Comments (please specify):

I am committed to working in conjunction with my federal and provincial counterparts to secure the necessary funding for the development of critical local infrastructure projects to support Oshawa's future residential growth.
